## General Information

The API product group represents

- ✓ Full range of spring loaded safety valves acc. to API 526
- ✓ State-of-the-art design from the safety valve specialist
- ✓ Competitive solutions for the API market

### API safety valves from LESER

- Are designed to meet all applications which require API.
- Open rapidly with an overpressure of max. 10 % to the full design lift.
- Have a maximum blowdown of 7 % for steam/gas service and 20 % for liquid service.
- Are developed in a close cooperation with plant engineers and service specialists.
- Serve for protection of processes and equipment.
- Are approved by all important approval organisations worldwide which ensures the worldwide applicability e.g.:
  - European Community: CE-marking acc. to Pressure Equipment Directive (PED) 97 / 23 / EC and EN ISO 4126-1
  - USA: UV-stamp acc. to ASME Section VIII Division 1, National Board certified capacities
  - Germany: VdTÜV approval acc. to PED, EN ISO 4126-1, TÜV SV 100 and AD 2000-Merkblatt A2
  - Canada: Canadian Registration Number acc. to the requirements of particular provinces
  - China: AQSIQ based on the approval acc. to ASME Section VIII Division 1 and AD 2000-Merkblatt A2
  - Eurasian Custom Union: Approval acc. to Eurasian Custom Union (EAC - Eurasian Conformity)

Furthermore, all LESER API safety valves are designed, marked, produced and approved acc. to the requirements of the following regulations (directives, codes, rules and standards).

EN ISO 4126-7, EN 12266-1/-2, EN 1092 Part I and II flanging ASME PTC 25, ASME-Code Sec. II, ASME B 16.34 and ASME B16.5- flanging, API Std. 527, API RP 576, AD 2000-Merkblatt A4, AD 2000-Merkblatt HP0

## Applications

LESER – API safety valves offer ultimate protection against overpressure in all applications for steam, gases and liquids.

LESER's API Series safety valves present the simple safe solution for heavy duty applications, such as crude oil extraction, transportation and processing in

- Refineries
- Chemical industry
- Petrochemical industry
- Oil and gas – Onshore and Offshore
- Vessels and piping systems
- Blow-down systems
- Storage tank farms

## General design features

LESER's API Series covers a large variety of types, materials and options to fit any application:

- Design fully in accordance with API 526 for easy interchangeability
- Complete API 526 range: valve sizes 1" through 8", orifice D through T
- Materials: WCB, WCC, CF8M, WC6, LCB, LCC, and a wide range of special materials to fulfill the requirements of critical applications
- Special B<sup>3</sup> design for high back pressure applications and material requirements far beyond API Standard
- Fool proof design with fewer parts for built-in safety
- Integral cast support brackets for easy handling and safe installation
- Open or closed bonnet, packed or plain lifting lever or gastight cap
- Flanged connections according ASME and DIN guarantee a worldwide applicability
- One design and spring (single trim) for steam, gas and liquid applications reduces the number of spare parts and ensures low cost maintenance management.
- One-piece spindle reduces friction which leads to high operation accuracy
- Self-draining body design, avoids residues and reduces corrosion
- Horizontal installation

## Options

- Special connections specified by the customer for optimised adaptation to the plant.
- Stellite or hardened metal sealing for longer product life
- Soft seat solutions for superior tightness
- Balanced bellows for back pressure compensation
- Heating jackets for applications with high viscosity fluids
- Any and every part can be produced in special material exactly to meet customer specification requirements

Remark: SA 352 Gr. LCB is not listed in the API 526. Pressure-Temperature Rating acc. to ASME B16.34 Table 2-1.3  
The stated Pressure-Temperature Rating are taken from ASME B16.34 Table 2-1.3 if the maximum pressure is not limited by API 526.

Due to the extended material test certificate the LESER LCB can be applied as LCC, WCB, WCC and 1.0619 with the respective pressure-temperature range as well.

Remark: SA 352 Gr. LCB is not listed in the API 526. Pressure-Temperature Rating acc. to ASME B16.34 Table 2-1.3  
The stated Pressure-Temperature Rating are taken from ASME B16.34 Table 2-1.3 if the maximum pressure is not limited by API 526.

Due to the extended material test certificate the LESER LCB can be applied as LCC, WCB, WCC and 1.0619 with the respective pressure-temperature range as well.

<sup>o)</sup> Please add code for the required cap or lifting device. See page 11.

Remark: SA 352 Gr. LCB is not listed in the API 526. Pressure-Temperature Rating acc. to ASME B16.34 Table 2-1.3  
The stated Pressure-Temperature Rating are taken from ASME B16.34 Table 2-1.3 if the maximum pressure is not limited by API 526.

Due to the extended material test certificate the LESER LCB can be applied as LCC, WCB, WCC and 1.0619 with the respective pressure-temperature range as well.

<sup>1)</sup> The pressure range 3.0 – 36.25 psig is outside of the type test approval acc. to ISO 4126-1 and AD 2000-Merkblatt A2 (CE).

<sup>a)</sup> Please add code for the required cap or lifting device. See page 11.

Remark: SA 352 Gr. LCB is not listed in the API 526. Pressure-Temperature Rating acc. to ASME B16.34 Table 2-1.3  
The stated Pressure-Temperature Rating are taken from ASME B16.34 Table 2-1.3 if the maximum pressure is not limited by API 526.

Due to the extended material test certificate the LESER LCB can be applied as LCC, WCB, WCC and 1.0619 with the respective pressure-temperature range as well.

<b>Outlet pressure limit</b>			
Balanced bellows design	2.1	6.9	

<sup>Ⓜ</sup>) Please add code for the required cap or lifting device. See page 11.

( ) = maximum set pressure of Type 526 high pressure design (Option code Z90)

Remark: SA 352 Gr. LCB is not listed in the API 526. Pressure-Temperature Rating acc. to ASME B16.34 Table 2-1.3  
The stated Pressure-Temperature Rating are taken from ASME B16.34 Table 2-1.3 if the maximum pressure is not limited by API 526.

Due to the extended material test certificate the LESER LCB can be applied as LCC, WCB, WCC and 1.0619 with the respective pressure-temperature range as well.

<sup>1)</sup> 300L x 150 is available with the same Article-No.

Note: Flange drillings and facings meet always the requirements of mentioned flange standards. Flange thickness and outer diameter may be thicker and wider than flange standard. For correct selection of bolting please refer to LDeS 3007.01. The inlet pressure size CL150 is not considered, please switch to inlet pressure size CL300 or CL300L.

## Type 526

### Outlet flange rating class 300

For customer specifications requiring a flange rating class 300 at the outlet LESER provides Type 526 with outlet flange rating class 300. For ordering please state the article numbers and option codes which are listed in the table.

Orifice	Valve size Inlet x Outlet	Body material	300 x 300		600 x 300	
	Center to face a x b		Art. No.	Option code	Art. No.	Option code
D	1" x 2"	WCB 1.0619	5262.002X	H65, H80, S01	5262.003X	H65, H80, S01

## Flange facings

Type 526

Acc. to DIN EN 1092						
Flange facing (see also WI 3313.40)		Inlet		Outlet		Remark
		PN 10 – PN 40	PN 63 – PN 400	PN 10 – PN 40	PN 63	
Raised face	Type B1	*	–	*	–	Facing: Rz = 12.5 – 50
	Type B2	L36	*	L38	*	Facing: Rz = 3.2 – 12.5
Tongue face C <sup>1)</sup>		S05		H92		
Groove face D <sup>1)</sup>		S05		H91		
Male face E		S05		H98		
Female face F		S05		H99		
O-ring male face G		S05		S01		
O-ring female face H		S05		S01		

Acc. to ASME B16.5												
Body material	Inlet	Outlet	Smooth finish <sup>2)</sup>		Serrated finish		RTJ-Groove					
			Inlet	Outlet	Inlet	Outlet	Inlet				Outlet	
			Option code	Option code	CL300	CL600	CL900	CL1500	CL2500	CL150	CL300	
All	All	All	L52	L53	*	*	L58				H63	

<sup>1)</sup> LESER manufactures the groove at flanged valves by milling. If a customer demands a turned surface in the soil of the groove according to DIN 2512 and / or DIN EN 1092-1 an additional option code is necessary: "S01: bottom of the groove drilled". <sup>2)</sup> Smooth finish is not defined in the effective standards.

Note: Flange drillings and facings meet always the requirements of mentioned flange standards. Flange thickness and outer diameter may vary from flange standard.

**Stud-bolts length for flange connection inlet and outlet**

All LESER safety valves Type 526 need at the inlet side longer stud-bolts for the flange connections as stated in ASME B16.5, due to the full nozzle design. Furthermore, due to the actual castings the stud bolts at the outlet can differ from ASME B16.5 as well. LESER state the stud-bolt length in LDeS 3001.29. For calculation of stud-bolts length the measure "s" stated on page 12 – 15 can be used.

Connection acc. to API Standard 526 – 1984					
Orifice	Valve size		Flange rating class		Option code
	Inlet	Outlet	Inlet		
D / E	1 1/2"	3", drilled 2 1/2"	CL2500		S01
F	1 1/2"	3", drilled 2 1/2"	CL900		S01
G	1 1/2"	3", drilled 2 1/2"	CL150 – 900		S01
J	2 1/2"	4"	CL900 – 1500		S01
K	2 1/2"	6"	CL900 – 1500		S01

General information concerning flange drillings and flange facings	
<b>Dimensions</b>	Flange dimensions of LESER Type 526 exceed flange dimension as mentioned in ASME / ANSI B16.5 and DIN EN 1092. This exceedance is in accordance with API Standard 526, Section 2.4. Dimensions: "For some valve designs, the inlet raised face height may substantially exceed the nominal dimension specified in ASME / ANSI B16.5 (and DIN EN 1092). Consult the manufacturer for exact dimension." The reason for this exceedance is: – height of nozzle placed in the inlet of valve – due to the outer diameter of the nozzle thread flange thickness has to be thicker than normal ASME / ANSI B16.5 and DIN EN 1092 dimension to achieve the required pressure rating
<b>Multiple pressure rating</b>	The flange standard shows the same drilling, facing and outer diameter for several pressure ratings, e.g. PN 16 up to PN 40. Due to the pressure rating of the casting LESER fulfills the requirements for flange thickness e.g. of PN 16 but not PN 40.
<b>Smooth Finish</b>	The effective MSS SP-6 (Edition 2001) does not mention "smooth finish" anymore. In MSS SP-6 (Edition 1980) "smooth finish" is defined for finishes of contact flanges as "250 µinch (6.3 µm) AARH max." LESER supplies flange facings according to ASME B16.5 – 1996, paragraph 6.4.4.3: "Either a serrated concentric or serrated spiral finish resulting in service finish from 125 µinch to 250 µinch average roughness shall be furnished." This finish meets the requirements of MSS SP-6 (Edition 1980), which is not valid anymore!
<b>Stock Finish</b>	Stock finish is not defined in any technical standard. If purchase orders show "stock finish" LESER supplies standard facing according to DIN or ASME (marked with * in table "Flange facings" of each valve series).

## Type 526

### LESER Original Spare Parts Kits

The LESER Spare Parts Kits contain all the parts recommended for the regular maintenance of a LESER safety valve.

#### Content

Item	Component	Material	Quantity
